## **Accounting Standard (AS) 20\***

**(issued 2001)**

### **Earnings Per Share**

*(This Accounting Standard includes paragraphs set in **bold italic** type and plain type, which have equal authority. Paragraphs in bold italic type indicate the main principles. This Accounting Standard should be read in the context of its objective and the Preface to the Statements of Accounting Standards<sup>1</sup>.)*

Accounting Standard (AS) 20, 'Earnings Per Share', issued by the Council of the Institute of Chartered Accountants of India, comes into effect in respect of accounting periods commencing on or after 1-4-2001 and is mandatory in nature<sup>2</sup> from that date, in respect of enterprises whose equity shares or potential equity shares are listed on a recognised stock exchange in India.

An enterprise which has neither equity shares nor potential equity shares which are so listed but which discloses earnings per share, should calculate and disclose earnings per share in accordance with this Standard from the aforesaid date<sup>3</sup>. However, in respect of accounting periods commencing on or after 1-4-2004, if any such enterprise does not fall in any of the following categories, it need not disclose diluted earnings per share (both including and excluding extraordinary items) and information required by

---

\* A limited revision to this Standard has been made in 2004, pursuant to which paragraphs 48 and 51 of this Standard have been revised (See footnotes 8 and 9).

<sup>1</sup> Attention is specifically drawn to paragraph 4.3 of the Preface, according to which Accounting Standards are intended to apply only to items which are material.

<sup>2</sup> Reference may be made to the section titled 'Announcements of the Council regarding status of various documents issued by the Institute of Chartered Accountants of India' appearing at the beginning of this Compendium for a detailed discussion on the implications of the mandatory status of an accounting standard.

<sup>3</sup> See also Accounting Standards Interpretation (ASI) 12, published elsewhere in this Compendium.

paragraph 48 (ii) of this Standard<sup>4</sup>:

- (i) Enterprises whose equity securities or potential equity securities are listed outside India and enterprises whose debt securities (other than potential equity securities) are listed whether in India or outside India.
- (ii) Enterprises which are in the process of listing their equity or debt securities as evidenced by the board of directors' resolution in this regard.
- (iii) Banks including co-operative banks.
- (iv) Financial institutions.
- (v) Enterprises carrying on insurance business.
- (vi) All commercial, industrial and business reporting enterprises, whose turnover for the immediately preceding accounting period on the basis of audited financial statements exceeds Rs. 50 crore. Turnover does not include 'other income'.
- (vii) All commercial, industrial and business reporting enterprises having borrowings, including public deposits, in excess of Rs. 10 crore at any time during the accounting period.
- (viii) Holding and subsidiary enterprises of any one of the above at any time during the accounting period.

Where an enterprise (which has neither equity shares nor potential equity shares which are listed on a recognised stock exchange in India but which discloses earnings per share) has been covered in any one or more of the above categories and subsequently, ceases to be so covered, the enterprise will not qualify for exemption from the disclosure of diluted earnings per share (both including and excluding extraordinary items) and paragraph 48 (ii) of this Standard, until the enterprise ceases to be covered in any of the above categories for two consecutive years.

---

<sup>4</sup> Originally, no exemption was available to an enterprise, which had neither equity shares nor potential equity shares which were listed on a recognised stock exchange in India, but which disclosed earnings per share. It is clarified that no exemption is available even in respect of accounting periods commencing on or after 1-4-2004 to enterprises whose equity shares or potential equity shares are listed on a recognised stock exchange in India. It is also clarified that this Standard is not applicable to an enterprise which has neither equity shares nor potential equity shares which are listed on a recognised stock exchange in India and which also does not disclose earnings per share.

Where an enterprise (which has neither equity shares nor potential equity shares which are listed on a recognised stock exchange in India but which discloses earnings per share) has previously qualified for exemption from the disclosure of diluted earnings per share (both including and excluding extraordinary items) and paragraph 48(ii) of this Standard (being not covered by any of the above categories) but no longer qualifies for exemption in the current accounting period, this Standard becomes applicable, in its entirety, from the current period. However, the relevant corresponding previous period figures need not be disclosed.

If an enterprise (which has neither equity shares nor potential equity shares which are listed on a recognised stock exchange in India but which discloses earnings per share), pursuant to the above provisions, does not disclose the diluted earnings per share (both including and excluding extraordinary items) and information required by paragraph 48 (ii), it should disclose the fact.

The following is the text of the Accounting Standard.

## Objective

The objective of this Statement is to prescribe principles for the determination and presentation of earnings per share which will improve comparison of performance among different enterprises for the same period and among different accounting periods for the same enterprise. The focus of this Statement is on the denominator of the earnings per share calculation. Even though earnings per share data has limitations because of different accounting policies used for determining 'earnings', a consistently determined denominator enhances the quality of financial reporting.

## Scope

***1. This Statement should be applied by enterprises whose equity shares or potential equity shares are listed on a recognised stock exchange in India. An enterprise which has neither equity shares nor potential equity shares which are so listed but which discloses earnings per share should calculate and disclose earnings per share in accordance with this Statement.<sup>5</sup>***

---

<sup>5</sup> See also Accounting Standards Interpretation (ASI) 12, published elsewhere in this Compendium.

***2. In consolidated financial statements, the information required by this Statement should be presented on the basis of consolidated information.<sup>6</sup>***

3. This Statement applies to enterprises whose equity or potential equity shares are listed on a recognised stock exchange in India. An enterprise which has neither equity shares nor potential equity shares which are so listed is not required to disclose earnings per share. However, comparability in financial reporting among enterprises is enhanced if such an enterprise that is required to disclose by any statute or chooses to disclose earnings per share calculates earnings per share in accordance with the principles laid down in this Statement. In the case of a parent (holding enterprise), users of financial statements are usually concerned with, and need to be informed about, the results of operations of both the enterprise itself as well as of the group as a whole. Accordingly, in the case of such enterprises, this Statement requires the presentation of earnings per share information on the basis of consolidated financial statements as well as individual financial statements of the parent. In consolidated financial statements, such information is presented on the basis of consolidated information.

## **Definitions**

***4. For the purpose of this Statement, the following terms are used with the meanings specified:***

***An equity share is a share other than a preference share.***

***A preference share is a share carrying preferential rights to dividends and repayment of capital.***

***A financial instrument is any contract that gives rise to both a financial asset of one enterprise and a financial liability or equity shares of another enterprise.***

***A potential equity share is a financial instrument or other contract that entitles, or may entitle, its holder to equity shares.***

---

<sup>6</sup> Accounting Standard (AS) 21, 'Consolidated Financial Statements', specifies the requirements relating to consolidated financial statements.

***Share warrants or options are financial instruments that give the holder the right to acquire equity shares.***

***Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.***

5. Equity shares participate in the net profit for the period only after preference shares. An enterprise may have more than one class of equity shares. Equity shares of the same class have the same rights to receive dividends.

6. A financial instrument is any contract that gives rise to both a financial asset of one enterprise and a financial liability or equity shares of another enterprise. For this purpose, a financial asset is any asset that is

- (a) cash;
- (b) a contractual right to receive cash or another financial asset from another enterprise;
- (c) a contractual right to exchange financial instruments with another enterprise under conditions that are potentially favourable; or
- (d) an equity share of another enterprise.

A financial liability is any liability that is a contractual obligation to deliver cash or another financial asset to another enterprise or to exchange financial instruments with another enterprise under conditions that are potentially unfavourable.

7. Examples of potential equity shares are:

- (a) debt instruments or preference shares, that are convertible into equity shares;
- (b) share warrants;
- (c) options including employee stock option plans under which employees of an enterprise are entitled to receive equity shares as part of their remuneration and other similar plans; and

- (d) shares which would be issued upon the satisfaction of certain conditions resulting from contractual arrangements (contingently issuable shares), such as the acquisition of a business or other assets, or shares issuable under a loan contract upon default of payment of principal or interest, if the contract so provides.

## **Presentation**

*8. An enterprise should present basic and diluted earnings per share on the face of the statement of profit and loss for each class of equity shares that has a different right to share in the net profit for the period. An enterprise should present basic and diluted earnings per share with equal prominence for all periods presented.*

*9. This Statement requires an enterprise to present basic and diluted earnings per share, even if the amounts disclosed are negative (a loss per share).*

## **Measurement**

### **Basic Earnings Per Share**

*10. Basic earnings per share should be calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period.*

#### **Earnings - Basic**

*11. For the purpose of calculating basic earnings per share, the net profit or loss for the period attributable to equity shareholders should be the net profit or loss for the period after deducting preference dividends and any attributable tax thereto for the period.*

12. All items of income and expense which are recognised in a period, including tax expense and extraordinary items, are included in the determination of the net profit or loss for the period unless an Accounting Standard requires or permits otherwise (*see Accounting Standard (AS) 5, Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies*). The amount of preference dividends and any attributable tax thereto for the period is deducted from the net profit for the

period (or added to the net loss for the period) in order to calculate the net profit or loss for the period attributable to equity shareholders.

13. The amount of preference dividends for the period that is deducted from the net profit for the period is:

- (a) the amount of any preference dividends on non-cumulative preference shares provided for in respect of the period; and
- (b) the full amount of the required preference dividends for cumulative preference shares for the period, whether or not the dividends have been provided for. The amount of preference dividends for the period does not include the amount of any preference dividends for cumulative preference shares paid or declared during the current period in respect of previous periods.

14. If an enterprise has more than one class of equity shares, net profit or loss for the period is apportioned over the different classes of shares in accordance with their dividend rights.

#### **Per Share - Basic**

***15. For the purpose of calculating basic earnings per share, the number of equity shares should be the weighted average number of equity shares outstanding during the period.***

16. The weighted average number of equity shares outstanding during the period reflects the fact that the amount of shareholders' capital may have varied during the period as a result of a larger or lesser number of shares outstanding at any time. It is the number of equity shares outstanding at the beginning of the period, adjusted by the number of equity shares bought back or issued during the period multiplied by the time-weighting factor. The time-weighting factor is the number of days for which the specific shares are outstanding as a proportion of the total number of days in the period; a reasonable approximation of the weighted average is adequate in many circumstances.

Appendix I illustrates the computation of weighted average number of shares.

17. In most cases, shares are included in the weighted average number of shares from the date the consideration is receivable, for example:

**390** AS 20 (issued 2001)

- (a) equity shares issued in exchange for cash are included when cash is receivable;
- (b) equity shares issued as a result of the conversion of a debt instrument to equity shares are included as of the date of conversion;
- (c) equity shares issued in lieu of interest or principal on other financial instruments are included as of the date interest ceases to accrue;
- (d) equity shares issued in exchange for the settlement of a liability of the enterprise are included as of the date the settlement becomes effective;
- (e) equity shares issued as consideration for the acquisition of an asset other than cash are included as of the date on which the acquisition is recognised; and
- (f) equity shares issued for the rendering of services to the enterprise are included as the services are rendered.

In these and other cases, the timing of the inclusion of equity shares is determined by the specific terms and conditions attaching to their issue. Due consideration should be given to the substance of any contract associated with the issue.

18. Equity shares issued as part of the consideration in an amalgamation in the nature of purchase are included in the weighted average number of shares as of the date of the acquisition because the transferee incorporates the results of the operations of the transferor into its statement of profit and loss as from the date of acquisition. Equity shares issued during the reporting period as part of the consideration in an amalgamation in the nature of merger are included in the calculation of the weighted average number of shares from the beginning of the reporting period because the financial statements of the combined enterprise for the reporting period are prepared as if the combined entity had existed from the beginning of the reporting period. Therefore, the number of equity shares used for the calculation of basic earnings per share in an amalgamation in the nature of merger is the aggregate of the weighted average number of shares of the combined enterprises, adjusted to equivalent shares of the enterprise whose shares are outstanding after the amalgamation.

19. Partly paid equity shares are treated as a fraction of an equity share to the extent that they were entitled to participate in dividends relative to a fully paid equity share during the reporting period.

Appendix II illustrates the computations in respect of partly paid equity shares.

20. Where an enterprise has equity shares of different nominal values but with the same dividend rights, the number of equity shares is calculated by converting all such equity shares into equivalent number of shares of the same nominal value.

21. Equity shares which are issuable upon the satisfaction of certain conditions resulting from contractual arrangements (contingently issuable shares) are considered outstanding, and included in the computation of basic earnings per share from the date when all necessary conditions under the contract have been satisfied.

***22. The weighted average number of equity shares outstanding during the period and for all periods presented should be adjusted for events, other than the conversion of potential equity shares, that have changed the number of equity shares outstanding, without a corresponding change in resources.***

23. Equity shares may be issued, or the number of shares outstanding may be reduced, without a corresponding change in resources. Examples include:

- (a) a bonus issue;
- (b) a bonus element in any other issue, for example a bonus element in a rights issue to existing shareholders;
- (c) a share split; and
- (d) a reverse share split (consolidation of shares).

24. In case of a bonus issue or a share split, equity shares are issued to existing shareholders for no additional consideration. Therefore, the number of equity shares outstanding is increased without an increase in resources. The number of equity shares outstanding before the event is adjusted for the proportionate change in the number of equity shares outstanding as if the event had occurred at the beginning of the earliest period reported. For

**392** AS 20 (issued 2001)

example, upon a two-for-one bonus issue, the number of shares outstanding prior to the issue is multiplied by a factor of three to obtain the new total number of shares, or by a factor of two to obtain the number of additional shares.

Appendix III illustrates the computation of weighted average number of equity shares in case of a bonus issue during the period.

25. The issue of equity shares at the time of exercise or conversion of potential equity shares will not usually give rise to a bonus element, since the potential equity shares will usually have been issued for full value, resulting in a proportionate change in the resources available to the enterprise. In a rights issue, on the other hand, the exercise price is often less than the fair value of the shares. Therefore, a rights issue usually includes a bonus element. The number of equity shares to be used in calculating basic earnings per share for all periods prior to the rights issue is the number of equity shares outstanding prior to the issue, multiplied by the following factor:

$$\frac{\text{Fair value per share immediately prior to the exercise of rights}}{\text{Theoretical ex-rights fair value per share}}$$

The theoretical ex-rights fair value per share is calculated by adding the aggregate fair value of the shares immediately prior to the exercise of the rights to the proceeds from the exercise of the rights, and dividing by the number of shares outstanding after the exercise of the rights. Where the rights themselves are to be publicly traded separately from the shares prior to the exercise date, fair value for the purposes of this calculation is established at the close of the last day on which the shares are traded together with the rights.

Appendix IV illustrates the computation of weighted average number of equity shares in case of a rights issue during the period.

## **Diluted Earnings Per Share**

*26. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period should be adjusted for the effects of all dilutive potential equity shares.*

27. In calculating diluted earnings per share, effect is given to all dilutive potential equity shares that were outstanding during the period, that is:

- (a) the net profit for the period attributable to equity shares is:
  - (i) increased by the amount of dividends recognised in the period in respect of the dilutive potential equity shares as adjusted for any attributable change in tax expense for the period;
  - (ii) increased by the amount of interest recognised in the period in respect of the dilutive potential equity shares as adjusted for any attributable change in tax expense for the period; and
  - (iii) adjusted for the after-tax amount of any other changes in expenses or income that would result from the conversion of the dilutive potential equity shares.
- (b) the weighted average number of equity shares outstanding during the period is increased by the weighted average number of additional equity shares which would have been outstanding assuming the conversion of all dilutive potential equity shares.

28. For the purpose of this Statement, share application money pending allotment or any advance share application money as at the balance sheet date, which is not statutorily required to be kept separately and is being utilised in the business of the enterprise, is treated in the same manner as dilutive potential equity shares for the purpose of calculation of diluted earnings per share.

#### **Earnings - Diluted**

***29. For the purpose of calculating diluted earnings per share, the amount of net profit or loss for the period attributable to equity shareholders, as calculated in accordance with paragraph 11, should be adjusted by the following, after taking into account any attributable change in tax expense for the period:***

- (a) any dividends on dilutive potential equity shares which have been deducted in arriving at the net profit attributable to equity shareholders as calculated in accordance with paragraph 11;***

394 AS 20 (issued 2001)

- (b) *interest recognised in the period for the dilutive potential equity shares; and*
- (c) *any other changes in expenses or income that would result from the conversion of the dilutive potential equity shares.*

30. After the potential equity shares are converted into equity shares, the dividends, interest and other expenses or income associated with those potential equity shares will no longer be incurred (or earned). Instead, the new equity shares will be entitled to participate in the net profit attributable to equity shareholders. Therefore, the net profit for the period attributable to equity shareholders calculated in accordance with paragraph 11 is increased by the amount of dividends, interest and other expenses that will be saved, and reduced by the amount of income that will cease to accrue, on the conversion of the dilutive potential equity shares into equity shares. The amounts of dividends, interest and other expenses or income are adjusted for any attributable taxes.

Appendix V illustrates the computation of diluted earnings in case of convertible debentures.

31. The conversion of some potential equity shares may lead to consequential changes in other items of income or expense. For example, the reduction of interest expense related to potential equity shares and the resulting increase in net profit for the period may lead to an increase in the expense relating to a non-discretionary employee profit sharing plan. For the purpose of calculating diluted earnings per share, the net profit or loss for the period is adjusted for any such consequential changes in income or expenses.

#### **Per Share - Diluted**

32. *For the purpose of calculating diluted earnings per share, the number of equity shares should be the aggregate of the weighted average number of equity shares calculated in accordance with paragraphs 15 and 22, and the weighted average number of equity shares which would be issued on the conversion of all the dilutive potential equity shares into equity shares. Dilutive potential equity shares should be deemed to have been converted into equity shares at the beginning of the period or, if issued later, the date of the issue of the potential equity shares.*

33. The number of equity shares which would be issued on the conversion

of dilutive potential equity shares is determined from the terms of the potential equity shares. The computation assumes the most advantageous conversion rate or exercise price from the standpoint of the holder of the potential equity shares.

34. Equity shares which are issuable upon the satisfaction of certain conditions resulting from contractual arrangements (contingently issuable shares) are considered outstanding and included in the computation of both the basic earnings per share and diluted earnings per share from the date when the conditions under a contract are met. If the conditions have not been met, for computing the diluted earnings per share, contingently issuable shares are included as of the beginning of the period (or as of the date of the contingent share agreement, if later). The number of contingently issuable shares included in this case in computing the diluted earnings per share is based on the number of shares that would be issuable if the end of the reporting period was the end of the contingency period. Restatement is not permitted if the conditions are not met when the contingency period actually expires subsequent to the end of the reporting period. The provisions of this paragraph apply equally to potential equity shares that are issuable upon the satisfaction of certain conditions (contingently issuable potential equity shares).

***35. For the purpose of calculating diluted earnings per share, an enterprise should assume the exercise of dilutive options and other dilutive potential equity shares of the enterprise. The assumed proceeds from these issues should be considered to have been received from the issue of shares at fair value. The difference between the number of shares issuable and the number of shares that would have been issued at fair value should be treated as an issue of equity shares for no consideration.***

36. Fair value for this purpose is the average price of the equity shares during the period. Theoretically, every market transaction for an enterprise's equity shares could be included in determining the average price. As a practical matter, however, a simple average of last six months weekly closing prices are usually adequate for use in computing the average price.

37. Options and other share purchase arrangements are dilutive when they would result in the issue of equity shares for less than fair value. The amount of the dilution is fair value less the issue price. Therefore, in order to calculate diluted earnings per share, each such arrangement is treated as consisting of:

**396** AS 20 (issued 2001)

- (a) a contract to issue a certain number of equity shares at their average fair value during the period. The shares to be so issued are fairly priced and are assumed to be neither dilutive nor anti-dilutive. They are ignored in the computation of diluted earnings per share; and
- (b) a contract to issue the remaining equity shares for no consideration. Such equity shares generate no proceeds and have no effect on the net profit attributable to equity shares outstanding. Therefore, such shares are dilutive and are added to the number of equity shares outstanding in the computation of diluted earnings per share.

Appendix VI illustrates the effects of share options on diluted earnings per share.

38. To the extent that partly paid shares are not entitled to participate in dividends during the reporting period they are considered the equivalent of warrants or options.

### **Dilutive Potential Equity Shares**

***39. Potential equity shares should be treated as dilutive when, and only when, their conversion to equity shares would decrease net profit per share from continuing ordinary operations.***

40. An enterprise uses net profit from continuing ordinary activities as “the control figure” that is used to establish whether potential equity shares are dilutive or anti-dilutive. The net profit from continuing ordinary activities is the net profit from ordinary activities (as defined in AS 5) after deducting preference dividends and any attributable tax thereto and after excluding items relating to discontinued operations<sup>7</sup>.

41. Potential equity shares are anti-dilutive when their conversion to equity shares would increase earnings per share from continuing ordinary activities or decrease loss per share from continuing ordinary activities. The effects of anti-dilutive potential equity shares are ignored in calculating diluted earnings per share.

---

<sup>7</sup> Accounting Standard (AS) 24, ‘Discontinuing Operations’, specifies the requirements in respect of discontinued operations.

42. In considering whether potential equity shares are dilutive or anti-dilutive, each issue or series of potential equity shares is considered separately rather than in aggregate. The sequence in which potential equity shares are considered may affect whether or not they are dilutive. Therefore, in order to maximise the dilution of basic earnings per share, each issue or series of potential equity shares is considered in sequence from the most dilutive to the least dilutive. For the purpose of determining the sequence from most dilutive to least dilutive potential equity shares, the earnings per incremental potential equity share is calculated. Where the earnings per incremental share is the least, the potential equity share is considered most dilutive and vice-versa.

Appendix VII illustrates the manner of determining the order in which dilutive securities should be included in the computation of weighted average number of shares.

43. Potential equity shares are weighted for the period they were outstanding. Potential equity shares that were cancelled or allowed to lapse during the reporting period are included in the computation of diluted earnings per share only for the portion of the period during which they were outstanding. Potential equity shares that have been converted into equity shares during the reporting period are included in the calculation of diluted earnings per share from the beginning of the period to the date of conversion; from the date of conversion, the resulting equity shares are included in computing both basic and diluted earnings per share.

## Restatement

***44. If the number of equity or potential equity shares outstanding increases as a result of a bonus issue or share split or decreases as a result of a reverse share split (consolidation of shares), the calculation of basic and diluted earnings per share should be adjusted for all the periods presented. If these changes occur after the balance sheet date but before the date on which the financial statements are approved by the board of directors, the per share calculations for those financial statements and any prior period financial statements presented should be based on the new number of shares. When per share calculations reflect such changes in the number of shares, that fact should be disclosed.***

45. An enterprise does not restate diluted earnings per share of any prior period presented for changes in the assumptions used or for the conversion of potential equity shares into equity shares outstanding.

**398** AS 20 (issued 2001)

46. An enterprise is encouraged to provide a description of equity share transactions or potential equity share transactions, other than bonus issues, share splits and reverse share splits (consolidation of shares) which occur after the balance sheet date when they are of such importance that non-disclosure would affect the ability of the users of the financial statements to make proper evaluations and decisions. Examples of such transactions include:

- (a) the issue of shares for cash;
- (b) the issue of shares when the proceeds are used to repay debt or preference shares outstanding at the balance sheet date;
- (c) the cancellation of equity shares outstanding at the balance sheet date;
- (d) the conversion or exercise of potential equity shares, outstanding at the balance sheet date, into equity shares;
- (e) the issue of warrants, options or convertible securities; and
- (f) the satisfaction of conditions that would result in the issue of contingently issuable shares.

47. Earnings per share amounts are not adjusted for such transactions occurring after the balance sheet date because such transactions do not affect the amount of capital used to produce the net profit or loss for the period.

## **Disclosure**

**48. *In addition to disclosures as required by paragraphs 8, 9 and 44 of this Statement, an enterprise should disclose the following:***

- (i) ***where the statement of profit and loss includes extraordinary items (within the meaning of AS 5, Net Profit or Loss for the Period, Prior Period Items and Changes in Accounting Policies), the enterprise should disclose basic and diluted earnings per share computed on the basis of earnings excluding extraordinary items (net of tax expense); and***

- (ii) (a) *the amounts used as the numerators in calculating basic and diluted earnings per share, and a reconciliation of those amounts to the net profit or loss for the period;*
- (b) *the weighted average number of equity shares used as the denominator in calculating basic and diluted earnings per share, and a reconciliation of these denominators to each other; and*
- (c) *the nominal value of shares along with the earnings per share figures.<sup>8</sup>*

49. Contracts generating potential equity shares may incorporate terms and conditions which affect the measurement of basic and diluted earnings per share. These terms and conditions may determine whether or not any potential equity shares are dilutive and, if so, the effect on the weighted average number of shares outstanding and any consequent adjustments to the net profit attributable to equity shareholders. Disclosure of the terms and conditions of such contracts is encouraged by this Statement.

**50. *If an enterprise discloses, in addition to basic and diluted earnings per share, per share amounts using a reported component of net profit other than net profit or loss for the period attributable to equity shareholders, such amounts should be calculated using the weighted average number of equity shares determined in accordance with this Statement. If a component of net profit is used which is not reported as***

---

<sup>8</sup> As a limited revision to AS 20, the Council of the Institute decided to revise this paragraph in 2004. This revision comes into effect in respect of accounting periods commencing on or after 1.4.2004. General Clarification (GC) - 10/2002, on AS 20 issued by the Accounting Standards Board, in October 2002, stands withdrawn from that date (See 'The Chartered Accountant', February 2004, pp. 817). The erstwhile paragraph was as under:

**“48. *In addition to disclosures as required by paragraphs 8, 9 and 44 of this Statement, an enterprise should disclose the following:***

- (a) *the amounts used as the numerators in calculating basic and diluted earnings per share, and a reconciliation of those amounts to the net profit or loss for the period;*
- (b) *the weighted average number of equity shares used as the denominator in calculating basic and diluted earnings per share, and a reconciliation of these denominators to each other; and*
- (c) *the nominal value of shares along with the earnings per share figures.”*

***a line item in the statement of profit and loss, a reconciliation should be provided between the component used and a line item which is reported in the statement of profit and loss. Basic and diluted per share amounts should be disclosed with equal prominence.***

51. An enterprise may wish to disclose more information than this Statement requires. Such information may help the users to evaluate the performance of the enterprise and may take the form of per share amounts for various components of net profit. Such disclosures are encouraged. However, when such amounts are disclosed, the denominators need to be calculated in accordance with this Statement in order to ensure the comparability of the per share amounts disclosed.<sup>9</sup>

---

<sup>9</sup> As a limited revision to AS 20, the Council of the Institute decided to revise this paragraph in 2004. This revision comes into effect in respect of accounting periods commencing on or after 1.4.2004. General Clarification (GC) - 10/2002, on AS 20 issued by the Accounting Standards Board, in October 2002, stands withdrawn from that date (See 'The Chartered Accountant' February 2004, pp. 817). The erstwhile paragraph was as under:

“51. An enterprise may wish to disclose more information than this Statement requires. Such information may help the users to evaluate the performance of the enterprise and may take the form of per share amounts for various components of net profit, e.g., profit from ordinary activities. Such disclosures are encouraged. However, when such amounts are disclosed, the denominators need to be calculated in accordance with this Statement in order to ensure the comparability of the per share amounts disclosed.”

## Appendices

*Note: These appendices are illustrative only and do not form part of the Accounting Standard. The purpose of the appendices is to illustrate the application of the Accounting Standard.*

### Appendix I

#### Example - Weighted Average Number of Shares (Accounting year 01-01-20X1 to 31-12-20X1)

		No. of Shares Issued	No. of Shares Bought Back	No. of Shares Outstanding
1 <sup>st</sup> January, 20X1	Balance at beginning of year	1,800	-	1,800
31 <sup>st</sup> May, 20X1	Issue of shares for cash	600	-	2,400
1 <sup>st</sup> Nov., 20X1	Buy Back of shares	-	300	2,100
31 <sup>st</sup> Dec., 20X1	Balance at end of year	2,400	300	2,100
Computation of Weighted Average: $(1,800 \times 5/12) + (2,400 \times 5/12) + (2,100 \times 2/12) = 2,100$ shares.  The weighted average number of shares can alternatively be computed as follows: $(1,800 \times 12/12) + (600 \times 7/12) - (300 \times 2/12) = 2,100$ shares				

**Appendix II**

**Example – Partly paid shares**  
(Accounting year 01-01-20X1 to 31-12-20X1)

		No. of shares issued	Nominal value of shares	Amount paid
1 <sup>st</sup> January, 20X1	Balance at beginning of year	1,800	Rs. 10	Rs. 10
31 <sup>st</sup> October, 20X1	Issue of Shares	600	Rs. 10	Rs. 5
<p>Assuming that partly paid shares are entitled to participate in the dividend to the extent of amount paid, number of partly paid equity shares would be taken as 300 for the purpose of calculation of earnings per share.</p> <p>Computation of weighted average would be as follows:</p> <p><math>(1,800 \times 12/12) + (300 \times 2/12) = 1,850</math> shares.</p>				

## Appendix III

## Example - Bonus Issue

(Accounting year 01-01-20XX to 31-12-20XX)

Net profit for the year 20X0	Rs. 18,00,000
Net profit for the year 20X1	Rs. 60,00,000
No. of equity shares outstanding until 30 <sup>th</sup> September 20X1	20,00,000
Bonus issue 1 <sup>st</sup> October 20X1	2 equity shares for each equity share outstanding at 30 <sup>th</sup> September, 20X1 $20,00,000 \times 2 = 40,00,000$
Earnings per share for the year 20X1	$\frac{\text{Rs. } 60,00,000}{(20,00,000 + 40,00,000)} = \text{Re. } 1.00$
Adjusted earnings per share for the year 20X0	$\frac{\text{Rs. } 18,00,000}{(20,00,000 + 40,00,000)} = \text{Re. } 0.30$
Since the bonus issue is an issue without consideration, the issue is treated as if it had occurred prior to the beginning of the year 20X0, the earliest period reported.	

### Appendix IV

#### Example - Rights Issue

(Accounting year 01-01-20XX to 31-12-20XX)

Net profit	<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 15%;">Year</td> <td style="width: 30%;">20X0 :</td> <td style="width: 55%;">Rs. 11,00,000</td> </tr> <tr> <td>Year</td> <td>20X1 :</td> <td>Rs. 15,00,000</td> </tr> </table>	Year	20X0 :	Rs. 11,00,000	Year	20X1 :	Rs. 15,00,000
Year	20X0 :	Rs. 11,00,000					
Year	20X1 :	Rs. 15,00,000					
No. of shares outstanding prior to rights issue	5,00,000 shares						
Rights issue	<p>One new share for each five outstanding (i.e. 1,00,000 new shares)</p> <p>Rights issue price : Rs. 15.00</p> <p>Last date to exercise rights: 1<sup>st</sup> March 20X1</p>						
Fair value of one equity share immediately prior to exercise of rights on 1 <sup>st</sup> March 20X1	Rs. 21.00						
<p><b>Computation of theoretical ex-rights fair value per share</b></p> <p>Fair value of all outstanding shares immediately prior to exercise of rights + total amount received from exercise</p> <hr style="width: 80%; margin-left: 0;"/> <p>Number of shares outstanding prior to exercise + number of shares issued in the exercise</p> $\frac{(\text{Rs. } 21.00 \times 5,00,000 \text{ shares}) + (\text{Rs. } 15.00 \times 1,00,000 \text{ shares})}{5,00,000 \text{ shares} + 1,00,000 \text{ shares}}$ <p>Theoretical ex-rights fair value per share = Rs. 20.00</p>							
<p><b>Computation of adjustment factor</b></p> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 55%;">Fair value per share prior to exercise of rights</td> <td style="width: 45%;">Rs. (21.00) = 1.05</td> </tr> <tr> <td>Theoretical ex-rights value per share</td> <td>Rs. (20.00)</td> </tr> </table>		Fair value per share prior to exercise of rights	Rs. (21.00) = 1.05	Theoretical ex-rights value per share	Rs. (20.00)		
Fair value per share prior to exercise of rights	Rs. (21.00) = 1.05						
Theoretical ex-rights value per share	Rs. (20.00)						
<p><b>Computation of earnings per share</b></p> <table style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 60%;"></th> <th style="width: 20%;">Year 20X0</th> <th style="width: 20%;">Year 20X1</th> </tr> </thead> <tbody> <tr> <td>EPS for the year 20X0 as originally reported: Rs. 11,00,000 / 5,00,000 shares</td> <td style="text-align: center;">Rs. 2.20</td> <td></td> </tr> </tbody> </table>			Year 20X0	Year 20X1	EPS for the year 20X0 as originally reported: Rs. 11,00,000 / 5,00,000 shares	Rs. 2.20	
	Year 20X0	Year 20X1					
EPS for the year 20X0 as originally reported: Rs. 11,00,000 / 5,00,000 shares	Rs. 2.20						

EPS for the year 20X0 restated for rights issue: Rs.11,00,000/ (5,00,000 shares x 1.05)	Rs. 2.10	
EPS for the year 20X1 including effects of rights issue  Rs. 15,00,000 <hr/> $(5,00,000 \times 1.05 \times 2/12) + (6,00,000 \times 10/12)$		Rs. 2.55

## Appendix V

**Example - Convertible Debentures**  
(Accounting year 01-01-20XX to 31-12-20XX)

Net profit for the current year	Rs. 1,00,00,000
No. of equity shares outstanding	50,00,000
Basic earnings per share	Rs. 2.00
No. of 12% convertible debentures of Rs. 100 each Each debenture is convertible into 10 equity shares	1,00,000
Interest expense for the current year	Rs. 12,00,000
Tax relating to interest expense (30%)	Rs. 3,60,000
Adjusted net profit for the current year	Rs. (1,00,00,000 + 12,00,000 - 3,60,000) = Rs. 1,08,40,000
No. of equity shares resulting from conversion of debentures	10,00,000
No. of equity shares used to compute diluted earnings per share	50,00,000 + 10,00,000 = 60,00,000
Diluted earnings per share	1,08,40,000/60,00,000 = Re. 1.81

## Appendix VI

**Example - Effects of Share Options on Diluted Earnings Per Share**  
(Accounting year 01-01-20XX to 31-12-20XX)

Net profit for the year 20X1	Rs. 12,00,000
Weighted average number of equity shares outstanding during the year 20X1	5,00,000 shares
Average fair value of one equity share during the year 20X1	Rs. 20.00
Weighted average number of shares under option during the year 20X1	1,00,000 shares
Exercise price for shares under option during the year 20X1	Rs. 15.00

**Computation of earnings per share**

	Earnings	Shares	Earnings per share
Net profit for the year 20X1	Rs. 12,00,000		
Weighted average number of shares outstanding during year 20X1		5,00,000	
<b>Basic earnings per share</b>			Rs. 2.40
Number of shares under option		1,00,000	
Number of shares that would have been issued at fair value: (100,000 x 15.00)/20.00	*	(75,000)	
<b>Diluted earnings per share</b>	Rs. 12,00,000	5,25,000	Rs. 2.29
*The earnings have not been increased as the total number of shares has been increased only by the number of shares (25,000) deemed for the purpose of the computation to have been issued for no consideration {see para 37(b)}
